

NATIONAL COMMUNICATIONS AUTHORITY

QUALITY OF SERVICE TEST RESULTS - 2022 FOURTH QUARTER

1.0. Introduction

In pursuance of obligations of the 3G Cellular Mobile Licence of Telecommunication Operators, the consumer perspective of quality of service are tested to ensure the compliance of Operators to the obligations on service quality to the user.

This First Quarter Monitoring Report highlights the Call Setup Time, Voice Quality (Mean Opinion Score), Data Throughput and 3G Coverage compliance statuses of all four (4) Mobile Network Operators in seven (7) Regions with regards to parameters outlined in their 3G Licences. The Regions monitored during this period were the Ashanti, Central, Eastern, Greater Accra, North East, Northern and Savannah Regions.

Definition of KPIs measured:

- ***Call Setup Time*** is a measure of the time it takes to setup a voice call. It is how long it takes to hear a ring back tone after initiating a call. It is measured in seconds. Threshold for compliance is over 95% of Call Setup Time measurements being less than 10 seconds.
- ***Voice Quality (Mean Opinion Score)*** is a measure of the perception of the audio quality of the conversation on a call. The MOS Score scale ranges from 1 to 5 with 1 being poor and 5 being excellent audio quality. Threshold for compliance is an average of all Voice Quality (MOS) measurements being greater than 3.5.
- ***3G Data Throughput*** is a measure of the rate of data transfer on a 3G network. It measures how fast data is transferred from a file transfer protocol (ftp) server to a mobile device. It is measured in kilobits per second (kbps) and the threshold for compliance is over 90% of all Data Download Sessions with average Data Throughput measurements being greater than or equal to 256kbps.
- ***3G Coverage*** is an assessment of whether an MNO has 3G presence in a district capital or not. This is done by measuring the downlink signal level, Received Signal Code Power (RSCP). Unit of measurement is the decibel-milliwatts (dBm) and threshold for compliance is an average of all measured RSCP levels being greater than -105dBm.
- ***4G Data Throughput*** is a measure of the rate of data transfer on a 4G network. It measures how fast data is transferred from a file transfer protocol (ftp) server to a mobile device. It is measured in Megabits per second (Mbps) and the threshold for compliance is an average of all Data Throughput measurements being greater than or equal to 5Mbps.

- **4G Data Service Access Time** is a measure of the time it takes for a web page to start loading on a 4G network. That is, it measures the time from when a user enters a URL and hits 'return' to when the web page download starts. It is measured in seconds (s) and the threshold for compliance is over 95% of 4G Data Service Access Time measurements being less than 5 seconds.
- **4G Latency** is a measure of the time it takes to transmit data between source and destination on a 4G network. Latency is calculated from the Round Trip Time obtained from ping tests. It is measured in milliseconds (ms) and the threshold for compliance is an average of all Latency measurements being less than or equal to eighty milli seconds (80ms).
- **4G Coverage** is an assessment of whether a Broadband Wireless Access (BWA) operator has 4G presence in a district capital or not. This is done by measuring the downlink signal level, Reference Signal Received Power (RSRP). Unit of measurement is the decibel-milliwatts (dBm) and threshold for compliance is an average of all measured RSRP levels being greater than -105dBm.

The details of the report are as below:

AIRTELTIGO RESULTS

CALL SETUP TIME (CST)
