

STATISTICS OF REGISTERED SIMs

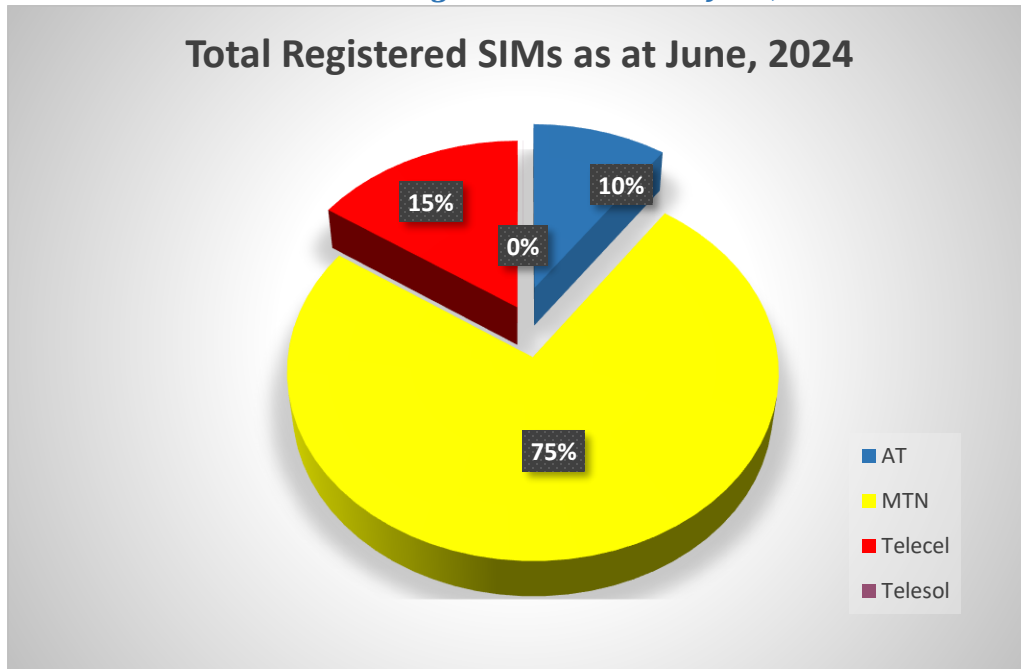

The National Communications Authority (NCA) completed the mass SIM Registration Exercise in May 2023. The primary objective of this national initiative was to establish a SIM database with integrity. While registration for existing subscribers concluded in May 2023, registration of new SIMs has been ongoing.

Subsequently, the NCA has been conducting forensic audits on the cumulative data, which are received from the various Network Operators, in the Central SIM Register. As of 14th June 2024, the total number of active registered SIMs (defined by the International Telecommunications Union as SIMs that are active within a 90-day period) in Ghana, as reported from the Central SIM Register, was **39,941,127**.

The breakdown, according to each Network Operator, is as tabulated below;

Network Operator	Number of Registered SIMs
AT	3,912,298
MTN	29,866,079
Telecel	6,161,598
Telesol	1,152

Chart 1 - Total Registered SIMs as at June, 2024

The NCA continues to urge consumers and the general public to check the number of SIM(s) linked to their Ghana Card by dialing ***402#** on their phones and following the prompts. Where a subscriber is no longer using a SIM(s), he/she is entreated to visit the Customer Care Centre(s) of the Network Operator to delink the number(s).

Note:

****Monthly breakdown of this statistics will be provided in due course.***
