

NATIONAL COMMUNICATIONS AUTHORITY

**LIST OF AUTHORISED
INTERNET/PUBLIC DATA SERVICE
PROVIDERS IN GHANA**

AS AT 2ND QUARTER, 2025

INTERNET SERVICE PROVIDER (ISP)

The term Internet Service Provider (ISP) refers to an entity that provides access and connectivity to the Internet. The said entity can use both licenced and unlicensed frequency bands for its deployments. The validity period of an ISP Authorisation is five (5) years.

The following are the service classifications under ISP

Internet / Public Data Service

Internet / Public Data Service (Rural)

Internet Hotspot

Application for Internet/Public Data Service may require an applicant to apply for frequency which will attract a fee separate from the regulatory fee to be paid to enable the provision of the service.

Internet Hotspot

An Internet Hotspot is a physical location where people may obtain Internet access using Wi-Fi technology via a Wireless Local Area Network (WLAN) connected to an Internet Service Provider's network (or MNO, BWA). The said entity can only use the unlicensed frequency bands for its deployments.

The coverage area of an Internet Hotspot Provider should not exceed three (3) Districts (Administrative District). An Internet Hotspot Provider may qualify to apply for an ISP Authorisation if the Provider seeks to cover more than three (3) administrative districts.

The table below shows the number of companies under the various ISP Service Classifications.

No.	ISP Service Classification	Operational	Not Operational	Number of Companies
1	Internet / Public Data Service	38	35	73
2	Internet / Public Data Service (Rural)	0	1	1
3	Internet Hotspot	4	0	4
Total		42	36	78
